* Add footprints search path

* peel-off Mask Design Rule specification
→ Minimum path of any peel-off element (p) : 0.500mm (20mil)
→ Maximum coverable hole ENDSIZE(H): 6.00mm (236mil)
→ Minimum coverable hole END SIZCH
→ Min overlap on copperpattern (ov) : 0.600mm (24mil)
→ Min clearance to free copper (w): 0.600 (24mil)
→ Min Distance from pcB outline
         ⟹ 0.500mm (20mil)

* Tolerance on position :- +/- 0.300nm (12mil)

→ Legend clipping clearance is 0.100mm (4mil) backk
  from the soldermask openings.

→ Any parts of line smaller than 0.100mm (4mil)
  will be Removed.

PHP security, creating, error Handler,

* When PHP security, there are two sides to error
Reporting one is beneficial to Increasing Security, The
order is detrimental.

* PHP error Handling

When creating scripts and Web Applications
error Handling is an Impart part.

⇒ different error handling Methods
  * simple "die()" statements.
  * custom errors and error triggers
  * error Reporting.

⇒ Creating a customer error handler

Syntax :- error — function (error-level, error-message
                error —file, error—line, error-context)

* Types of error :- parse error, fedded error, warning error,
                Notice error.

* PHP uses defined functions :-
    create four own functions

* A function is a Block of statements, that can be used
Repeatedly in program.

* A function Will Not Execute Automatically When a
Page loads.

* A function will be executed by a call to the
function.
